# Optimizing the onboarding process with robotic process automation.

In cooperation with Rabo Identity Services

Amsterdam, May 2020

### The reason why

The onboarding of new employees or users is very time consuming, there is a lot of **data** to process and there are many **regulations** you must be compliant with. In short: the integration and completion of an onboarding process can be much more **effecient**.

Meet the solution

# A configurable onboarding application.

Always customizable frontend, real-time compliance and controlled backend.

Agile way of working

Customized design

Proven identity & verification processes

Compliance requirements

## This is how it technically works.

User navigates to the progressive web application

Application safely connects and the onboarding flow starts

Designed flows execute Rabobank based IDP defined discovery rules Sources will be checked and returns token to DS after authentication

DS will feed the database(s) and services with the compliant content

# Here is how a user will experience it.

### Retrieve verified data via an electronic identity

#### Electronic identity verification

Customer will upload a passport or use NFC after an IDIN check or a Selfie will be done to be sure it is the right person

#### Lookup services

If applicable perform some lookup services (VOG; BIG registration / iBAN)

#### E-Mandates for recurring costs\*

If applicable get a consent for a mandate

#### Electronic signing

Get the contract ready and send a request by mail to sign the contract with e-ID

# 10 times faster 60% cheaper

- Datastreams

#### Customers

### Our real-time compliant integrations.

"The onboarding gives us the possibility to deliver fully compliant files to the health institutions we work with. Something highly appreciated but expected by our dear freelancers."

DIRECTOR & FOUNDER

Customers

### Our real-time compliant integrations.

"We provide our customers with various customized ISO certified services. In this way we meet the all increasingly strict privacy and compliancy standards."
